

CertiWood™

Technical Centre

Leading the Way

CertiWood™ quality audits and certifies nearly 2 billion sq/ft of plywood (3/8" basis) each year. That's well over 50 million sheets of plywood!

The Richmond Olympic Oval features the world's largest wooden roof (47,526 m²) which is covered by over 19,000 plywood panels bearing CertiWood's CANPLY mark.

Tom Burke
Manager,
Quality Testing &
Inspection

Colin Zimka
Inspector

Low Cost, Experienced and Canadian-based

CertiWood™ provides engineered wood products manufacturers the competitive edge that sets their products apart and facilitates market penetration.

CertiWood™ services are demonstrably the key to success in bringing wood products to market in a timely and cost effective manner.

Recently CertiWood™ has:

- Obtained CE marking for manufacturers seeking European access
- Secured new JAS certification of structural LVL
- Gained accreditation as a calibration lab
- Facilitated ICC and CCMC approval for a proprietary composite structural wood column

One Stop, Fast, Personalized Service:

CertiWood™ has one of the highest customer satisfaction rates among member companies in the entire North American forest industry.

When asked about CertiWood, they said:

- "*CertiWood is committed to the success of our business.*"
- "*Very quick response... can do attitude*"
- "*Timely, consistent, take time to explain results*"

CertiWood™ is well positioned in product codes and standards committees and can provide you with the insight and expertise to get your product to market.

International Product Certification

"Partner with CertiWood and we will save you time and money on your wood product testing and certification needs."

J.F. (Jim) Shaw
CertiWood President

What our Customers are Saying:

"CertiWood provided the know-how to successfully troubleshoot through the product development stage and deliver the testing we needed to get our I-joists certified.

I was pleased with the friendly service and problem solving skills of the CertiWood team. They ensured all testing was done by the book to meet all industry and regulatory standards."

"The dedicated technical centre staff did a great job of both testing our proprietary post products and helping us get U.S. acceptance."

"Testing conducted at the CertiWood Technical Centre was a key factor in bringing our laminated beam products to market in a timely and profitable manner."
